The key highlights of the report include:

Market Overview (2017-2027)

- Forecast CAGR (2022-2027): 4.1%

The global coffee machine market is expected to be driven by consumers' evolving tastes with respect to coffee. Increased consumption of coffee in the Asian countries is one of the key factors driving the market growth. Along with this, the introduction of new products, such as green and organic coffee, is expected to result in high consumption, thereby contributing to the

market growth.

The fast-growing market for ready-to-drink (RTD) beverages, particularly coffee-infused beverages, is propelling the industry growth forward. In addition, owing to the popularity of automation in the past few years, a meteoric rise in the introduction of automatic coffee machines with features like digital display and personalisation facilities has been observed, which is driving the global market growth.

Industry Definition and Major Segments

Coffee machines are small electric appliances that are used to make coffee. Filter coffee machines, espresso coffee machines, capsule and pod coffee machines, and other models are available in a variety of sizes and shapes, as well as different types of models.
