

# Boost for employee protection as SMC extends monitoring services with CriticalArc's SafeZone technology

*Integrators can now give customers enhanced lone worker protection and multi-function 'safety everywhere' services through SMC*

LONDON, UNITED KINGDOM, September 5, 2022 /EINPresswire.com/ -- A first-of-its-kind partnership between CriticalArc and [Security Monitoring Centres](#) (SMC) will give systems integrators and their customers powerful new options for staff protection, communications, engagement, and wellbeing.

The two companies have confirmed an agreement which sees SMC extending its 24/7/365 SIA-NSI accredited monitoring services with the addition of CriticalArc's advanced [SafeZone](#) capabilities. SafeZone makes it easy for organisations to connect with their people wherever they are working - whether they are based remotely, lone working in the community, travelling on business, or present on-site.

SMC customers will also benefit from seamless upgrade options going beyond traditional lone worker protection to advanced, real-time response and team co-ordination, vehicle tracking, tip reporting, wellbeing tools, mass- and targeted-communications and emergency management capabilities. The technology is already trusted by millions of users worldwide across sectors including education, transportation, healthcare, and critical infrastructure settings, transforming how organisations respond to

incidents and allowing them to offer their people [Safety Everywhere™](#), wherever there is a duty of care.

SMC is one of the UK's longest-established fully accredited monitoring service providers, with highly trained teams providing reassurance to customers 24/7/365, through its network of alarm receiving centres (ARC's)

Now, with the addition of SafeZone technology, SMC's systems integrator partners will provide customers the reassurance of faster and more targeted responses to emergency situations without dependency on traditional proprietary lone worker hardware solutions. This will provide protection to individuals in virtually any location, the ability for staff to use a check-in timer and fall detection when working in high-risk environments, and to access routine help 24/7 at the touch of a button on a smartphone or wearable device.

“

Building on our trusted 24/7 monitoring services, we are delighted that our business partners can now offer customers 'Safety Everywhere' protection thanks to SafeZone technology”

*Colin Walters, Managing Director, SMC*

“Building on our trusted 24/7 monitoring services, we are delighted that our business partners can now offer customers 'Safety Everywhere' protection thanks to SafeZone technology,” says Colin Walters at SMC. “Our customers are looking for new ways to build more supportive workplace cultures while meeting their duty of care to all their people. CriticalArc's SafeZone is a transformative solution that lets them achieve this regardless of geography.”

Darren Chalmers-Stevens, Chief Operating Officer, CriticalArc said the partnership would benefit SMC's systems integrator partners and their end-user customers,

and deliver enhanced safety for thousands of employees in the workplace, as well as for staff working remotely, or travelling:

“SafeZone, now available through SMC monitoring, gives UK organisations outsourced
