

Consulting firm Logic20/20 issued patent for positional tracking systems

SEATTLE, WA, USA, September 6, 2022 /EINPresswire.com/ -- Logic20/20, a business and technology consulting firm, announced today that they have received a patent related to positional tracking systems. This patent outlines a new system and method for using positioning data in electronic communication networks.

This first-of-its-kind solution directly aligns with Logic20/20's focus on innovation. The firm is committed to bringing impactful ideas to market that make a difference in the lives of millions. This innovation strategy has led to the creation of leading-edge products and gives employees the opportunity to experiment and tap into their creativity.

Logic20/20 Patent Issued

“

Being issued this patent is a huge step forward and an amazing illustration of our teams working together to create a forward-looking solution.”

Travis Jones, SVP of North America

“We encourage our consultants to think outside the box and develop solutions that have real-world impact,” says Travis Jones, SVP of North America. “Being issued this patent is a huge step forward and an amazing illustration of our teams working together to create a forward-looking solution.”

Specifically, the patented approach allows users to co-locate and navigate assets while minimizing unnecessary radio transmissions and receptions. The developers saw a real business need for positioning devices and trackers in a

way that consumes less power. Streamlining both the tracker and the asset being tracked results in less power being used and longer battery life.

This advanced approach to co-location will be available to interested parties for a fee. To learn more or contact the firm, visit logic2020.com.

About Logic20/20

Headquartered in Seattle with offices nationwide, business and technology consulting firm Logic20/20 has been helping clients address their toughest challenges—and achieve their most ambitious goals—since 2005.
