

Middle East and Africa Knee Cartilage Repair Market Expected to Reach USD 160.07 Million during the forecast period

Middle East and Africa Knee Cartilage Repair Market Size, Growth, Demand, Development, Forecast, Segmentation, Scope and Forecast

PUNE, MAHARASHTRA, INDIA,
September 1, 2022 /EINPresswire.com/

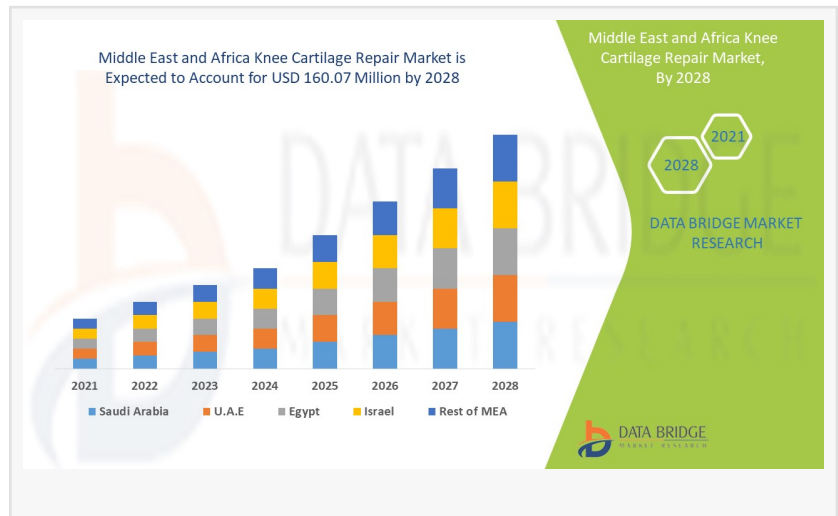

-- The [Middle East and Africa Knee Cartilage Repair Market](#) is expected to gain significant growth in the forecast period from 2021 to 2028. Data Bridge Market Research analyzes that the market is growing with a CAGR of 6.2%

in the forecast period from 2021 to 2028 and it is expected to reach USD 160.07 million by 2028. The increase in the number of elderly people is expected to drive the growth of the knee cartilage repair market.

Cartilage is a soft, elastic, rubber-like tissue that covers and protects the ends of the knee joints. Articular cartilage, which is mainly found in the knee joint, has a low coefficient of friction, high wear resistance, and weak regenerative properties. It is responsible for most of the compressive strength and load-bearing properties of the knee joint, and walking without it is quite uncomfortable. Osteoarthritis is a common cartilage failure disorder that can cause decreased range of motion, bone deterioration, and pain. It causes the joint surface to wear down, and in severe cases, bone can become exposed in the joint due to a combination of acute stress and chronic exhaustion.

The Middle East and Africa Knee Cartilage Repair market report provides details of market share, new developments and product portfolio analysis, impact of national and localized market players, analyzes opportunities in terms of market pockets. emerging revenues, changes in market regulations, product approvals, strategic decisions, product launches, geographic

expansions, and technological innovations in the market. To understand the market scenario and analysis, please contact Data Bridge Market Research for an analyst brief, our team will help you create a revenue impact solution to achieve your desired goal.

[Knee Cartilage Repair Market Scope and Market Size](#)

The Middle East and Africa Knee Cartilage Repair Market is segmented on the basis of treatment, surgery, devices, application, end-user, and distribution channel. Cross-segment growth helps you analyze growth niches and go-to-market strategies to determine your core application areas and the difference in your target markets.

Based on treatment, the Middle East and Africa knee cartilage repair market is segmented into cell-based and non-cell-based. In 2021, the cell-based segment is expected to dominate the market due to the increase in the number of research and development activities for stem cell-derived products.

On the basis of surgery, the Middle East and Africa knee cartilage repair market is segmented into osteochondral autograft transplantation, osteochondral allograft transplantation, microfracture, perforation, abrasion arthroplasty, autologous chondrocyte implantation, and others. In 2021, the autologous chondrocyte implantation segment is expected to dominate the market due to excellent long-term results and the ability to help patients return to previous activity levels.

On the basis of devices, the Middle East and Africa knee cartilage repair market is segmented into implants, osteotomy, bone grafts, arthroscopy, resurfacing, arthrodesis, and others. In 2021, the implant segment is expected to dominate the market due to the increase in the number of traffic accidents in the region.

Based on application, the Middle East and Africa knee cartilage repair market is segmented into osteoarthritis, rheumatoid arthritis, osteonecrosis, fractures, bone tumors, and others. In 2021, the osteoarthritis segment is expected to dominate the market due to the increase in the number of elderly people.

On the basis of end user, the Middle East and Africa knee cartilage repair market is segmented into hospitals, ambulatory surgical centers, and independent centers. In 2021, the hospital segment is expected to dominate the market due to the increase in traffic accidents and sports-related injuries.

On the basis of distribution channel, the knee cartilage repair market is segmented into third-party distributors, online sales, direct sales, and others. In 2021, the direct sales segment is expected to dominate the market due to increased customer convenience.
