Anthracite Global Market Report 2022 – Market Size, Trends, And Forecast 2022-2026

published by The Business Research Company, the anthracite market size is expected to grow to \$98.97 billion in 2026 at a compound annual growth rate (CAGR) of 3.0%. The [anthracite industry](#) growth is due to an increase in domestic fuel and power generation projects in rapidly developing countries such as China and India, owing to the rise in population and infrastructure.

The anthracite mining market consists of sales of anthracite by entities (organizations, sole traders, and partnerships) that mine bituminous coal, anthracite, and lignite coal by underground mining, strip mining, culm bank mining, and other surface mining techniques. The anthracite mining industry also develops anthracite mine sites and improves anthracite, including cleaning, washing, screening, and sizing of anthracite.

Global Anthracite Market Trends

Anthracite mining companies are using RFID technology to monitor and control the level of methane in mines, which can cause explosions. Every employee is outfitted with an active RFID badge that continuously communicates their location to the RFID readers installed across the site. This information is relayed to the database, allowing us to track employees' locations and their status by their badge ID. These companies are also using automated temporary roof support (ATRS) and mobile roof support (MRS) solutions to prevent rockfalls caused by the bolting of rocks, which is predicted to be shaping the anthracite market outlook.

[Global Anthracite Market Segments](#)

The global anthracite market is segmented:

By Type: Standard Grade Anthracite, High Grade Anthracite and Ultra-High Grade Anthracite

By Mining Type: Underground Mining, Surface Mining

By Geography: The global anthracite market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, Asia-Pacific accounts for the largest share.
