

Coccidiosis Treatment Market Size Expected to Reach US\$2.4 billion with CAGR of 3.6% by 2027 – IndustryARC

Rising pervasiveness of ailments like coccidiosis and toxoplasmosis are set to propel the growth of the coccidiosis treatment market.

HYDERABAD, TELANGANA, INDIA, September 2, 2022 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that the [coccidiosis treatment market](#) size is estimated to reach \$2.4 billion by 2027, growing at a CAGR of 3.6% during the forecast period 2022-2027. The surging acceptance of exhaustive farming techniques and proliferating demand for meat proteins fuelling meat generation in developed countries are set to drive the Coccidiosis Treatment Market. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.

Key Takeaways:

This IndustryARC report on the coccidiosis treatment market highlights the following areas -

1. Geographically, North America Coccidiosis Treatment Market accounted for the highest revenue share in 2021 and it is poised to dominate the market over the period 2022-2027 owing to the enormous demand for meat food and related products and the proliferating count of poultry and companion animals together with the growing predominance of coccidian ailments including toxoplasmosis in the North American region.
2. Coccidiosis Treatment Market growth is being driven by the increasing predominance of coccidian diseases amidst poultry and companion animals including toxoplasmosis and the expanding population and per capita intake of meat. However, the rising food safety concerns and augmenting meat prices worldwide are some of the major factors hampering the growth of Coccidiosis Treatment Market.

3. Coccidiosis Treatment Market Detailed Analysis on the Strength, Weakness, and Opportunities of the prominent players operating in the market will be provided in the Coccidiosis Treatment Market report.
