Livestock keeping and agriculture are important economic activities worldwide. An increasing threat to these activities has been observed at a global level subsequently creating an increasing demand for acaricides to control mites/ticks and pests. The increasing infestation from mites/ticks and pests are causing health hazards to the worldwide population which is increasing the disease burden.

This market research study determines the increase in changes and the aspects which are likely to have an impact on the growth of the Acaricides Market. Increased demand for the technologies is also one of the factors, which are likely to boost the growth of this industry. The market research study uses several tools and techniques which are used for the determination of the growth of the market.

Major key players -

BASF SE,
Bayer AG,

FMC Corporation,
DuPont,
Nissan Chemical Industries. Ltd.,
Syngenta,
Merck & Co., Inc.,
The Dow Chemical Company,
Chemtura Corporation,
Arysta LifeScience Limited.

COVID-19 Scenario Analysis:

- Global market has been significantly impacted by the COVID-19 outbreak. New projects throughout the world have stalled, which, in turn, have led to decline in demand for the market.
- Global factories have struggled to integrate new products as workers have stayed in their homes, which disrupted the global supply chains.
- The impact of COVID-19 on this market is temporary as just the production and supply chain is stalled. Once the situation improves, production, supply chains, and demand for hybrid chips are gradually going to increase.
- This COVID-19 lockdown would help companies think about more advanced Acaricides Market to enhance efficiency.
