

Spinal Intervention Market: In-depth analysis of the segmentation assists to determine prevailing market opportunities

Analysis of current research and clinical developments is provided with key dynamic factors that help in understanding the market behavior.

PORTLAND, OREGON, UNITED STATES, September 2, 2022 /EINPresswire.com/ -- Spinal intervention provides minimally invasive treatment for spine and nerve related painful conditions. The most frequently treated diseases are sciatica, herniated discs, arthritis of the spine, vertebral fracture, neuropathic or nerve pain in hands and legs, narrowing of the spinal canal, post-herpes neuralgia, trigeminal neuralgia, refractory pelvic pain, back or leg pain after back surgery, vascular diseases related pain, phantom limb pain and terminal cancer pain.

The [spinal intervention market](#) for surgical and replacement technologies is in an emerging state mainly due to rise in ageing population, increase in prevalence of neurological diseases and increase in obese population as they have higher chances of spine deformities. In addition, the market is driven by the rising public and private investments, grants and funds for the development of more advanced technologies. Conversely, dearth of skilled and experienced physicians, lack of patient awareness and high pricing pressure is a major factor restraining the market growth.
