

Neurological Hand Aid, Toothbrush Pillow Available To Demo In Utah

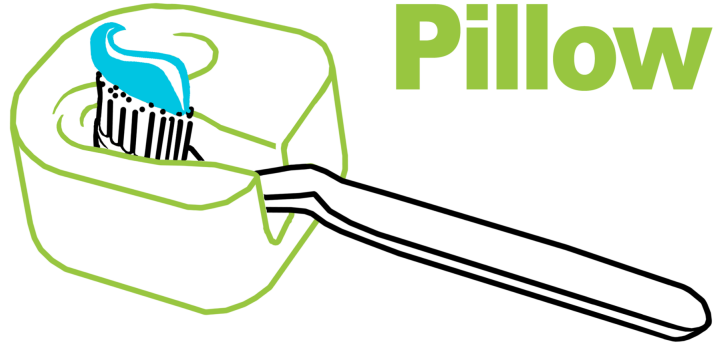

SALT LAKE CITY, UT, USA, November 19, 2022 /EINPresswire.com/ -- [Utah Assistive Technology Program \(UATP\)](#) lending library of tools, devices, and assistive technology services for persons with physical or neurological impairments, is expanding in a small way.

The latest addition to the device demonstration is the Toothbrush Pillow, a small countertop HSA & FSA medical device that balances a toothbrush in the horizontal position with bristles up to aid and assist physically or neurologically impaired individuals in applying toothpaste. Like all the numerous devices and services available from UATP, the Toothbrush Pillow can be tried by the user before committing to its use.

The Utah Assistive Technology Program (UATP) is part of the Institute for Disability Research, Policy and Practice at Utah State University. Their mission is to put assistive technology into the hands of people who need it. We also help people afford those devices. Their goal is to promote independence in education, employment, and community settings.

They serve individuals with disabilities of all ages throughout the state of Utah. Their job is to

Assistive Technology

provide assistive technology devices and services, as well as train parents, children with disabilities, professional service providers, and university students about assistive technology. They coordinate our services with community organizations and others who provide independence-related supports.

UATP will accept consumers regardless of race, national origin, religion, geographic location within the state of Utah, age, sex, disability, political affiliation, sexual orientation or belief.

UATP now has the Toothbrush Pillow thru the AT Demonstrations programs. This opportunity is for a person to interact with an AT device, learn about the different features and compare with other similar devices. An AT Device Demo allows a person to make an informed decision about whether the device is the right one.

According to [CDC.gov](https://www.cdc.gov) 2 percent of Utah adults have a self-care disability, 9 percent with mobility disability, and 5 percent have an independent living disability. Independent living is described as serious difficulty doing errands alone, such as visiting a doctor's office and self-care is difficulty dressing or bathing.

Funding for Utah Assistive Technology Program is available through a government-sponsored program called Assistive Technology Act Programs (ATAP), administered by the U.S. Department of Health and Human Services. HHS works through various state agencies that work closely with individual users impacted by disabling conditions.

The Assistive Technology Industry Association (ATiA) defines Assistive technology (AT) is any item, piece of equipment, software program, or product system that is used to increase, maintain, or improve the functional capabilities of persons with disabilities.

The small Toothbrush Pillow, like thousands of other devices designed to assist disabled and elderly, is available at 51 out of 56 assistive technology locations throughout all 50 states, four US territories, the District of Columbia and Puerto Rico.

About Toothbrush Pillow

The device is currently being used by individuals with the aging population, Parkinson's, arthritis, Multiple Sclerosis (MS), stroke, Autism, and upper limb amputees. Occupational therapists supply the Toothbrush Pillow and teaches client's proper oral care. The device creates opportunities for individuals with daily oral care when dealing with extraordinary medical issues in the absent of medical doctors. Very economical, easy to use, and can be used independently. The intellectual property behind TBP is owned by American Businessman, Anthem Pleasant.
