According to the newly released report, the Endy Mattress has built a national reputation as a popular mattress choice due to the convenience it continues to bring to shopping. The expert states that the Endy Mattress simplifies mattress browsing by providing Canadians with a singular selection. The goal of the report, then, is to

explore whether the Endy Mattress is the highest quality option as well as the most popular.

Direct Bed's report does this by evaluating the Endy Mattress in two main criteria - back support and pressure relief. The company sees these as the two most important aspects of any mattress.

As explained by the report, the Endy Mattress utilizes a base foam layer for support. Yet, Direct Bed points out that such a base tends to degrade over the long run, resulting in a reduction in comfort. In contrast, the company says that Canadian pocket-foil mattresses offer a longer-lasting base - contributing to a more reliable source of support and comfort.

In order to achieve superior support, Direct Bed suggests that the Endy Mattress will eventually adopt a pocket-coil design. By doing this, the company believes that Endy can provide its customers with greater durability, and in turn, improve their overall satisfaction.

As written in the new report: "We are noticing a surge of customers looking to switch away from Douglas & Endy mattresses after two to three years. Customers state that they are wearing out prematurely. It is our prediction that Endy will switch to a pocket coil support in order to maintain customer satisfaction."

Further to the added durability of pocket-coil mattresses, the report also claims that such varieties offer superior pressure relief. It advises that customers looking for relief should invest in pocket-coil mattress types - including, as Direct Bed foresees, future editions of the Endy Mattress.

Via its official website, Direct Bed offers Canada-wide shipping of mattresses suited to user needs - spanning king and queen-sized varieties and RV-suited mattresses.
