## Key Trends In The Electrical And Electronics Market

Virtual reality technology is being adopted by electronic manufacturing companies to improve manufacturing efficiency. This technology in the electronic manufacturing industry is often referred as digital design, simulation and integration. Virtual reality minimizes the scope for product defects in design phase. For instance, virtual reality technology enables companies to inspect design objects at all conceivable scales, thereby eliminating defects in the product in the design stage. For instance, some of the major companies adopting virtual reality include Integrated Microelectronics, Inc., Flextronics International Ltd, Benchmark Electronics, Inc. and Kimball International.
