-- [Pectin Market](#) is size is forecasted to reach US\$1.1 billion by 2027, after growing at a CAGR of 4.5% during 2022-2027. Pectin is a structural acidic heteropolysaccharide that is extracted from the cell walls of fruits and

vegetables. It has a high concentration

of galacturonic acid which is a sugar acid obtained from galactose. When Pectin is heated, along with a liquid, it expands and forms a thick gel. This makes Pectin an excellent thickener and gelling agent that is used in a variety of industries like the food & beverages, Pharmaceutical and Personal Care & Cosmetics. Pectin is also very safe and harmless to human bodies and has been approved by the World Health Organisation (WHO). The report describes various segmentations, the drivers & challenges, and the market landscape of the Pectin.

Key takeaways:

This IndustryARC report on the Pectin Market highlights the following areas -

1. The Asia-Pacific (APAC) region holds the largest share in the Pectin Market. This is largely due to the Food and Beverages Industry in the region.

Pectin is considered one of the safest and harmless food additives. It is extracted directly from the peels of fruits and vegetables.

2. Due to the increase in demand for Convenience Food and Fast Food as well as Dairy & Dairy-alternative products in regions like Europe and Asia-Pacific, the demand for Pectin has also observed a rise.
