Key Trends In The Paper Products Market

The paper industry has been shifting from labor intensive manufacturing processes to automated production facilities. Automation has enabled paper product companies to enhance productivity and reduce production costs. These technologies are also saving energy cost. Control systems such as integrated drive systems (IDS) are improving plant efficiency by minimizing energy consumption and simplifying service and maintenance processes.

Overview Of The Paper Products Market

The paper products market consists of sales of plastics products by entities (organizations, sole traders and partnerships) that produce plastics products. The companies in this industry produce packaging materials, film and sheet, foam products, plastic bottles and all other plastic products which have domestic and industrial applications. These companies use polymers and resins as raw materials which are primarily sourced from polymer suppliers and processes used in plastic products manufacturing include compression molding, extrusion molding, injection molding, blow molding and casting.
