*The Business Research Company's  
Antiemetics And Antinauseants Global  
Market Report 2022: Market Size, Trends,  
And Forecast To 2026*

LONDON, GREATER LONDON, UK,  
September 23, 2022 /

EINPresswire.com/ -- As per The  
Business Research Company's

"Antiemetics And Antinauseants Global  
Market Report 2022", the [antiemetics](#)

[and antinauseants market size](#) is expected to grow from \$7.23 billion in 2021 to \$ 7.71 billion in 2022 at a compound annual growth rate (CAGR) of 6.5%. The growth in the antiemetics and antinauseants market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. As per TBRC's antiemetics and antinauseants market outlook the market size is expected to reach \$9.29 billion in 2026 at a CAGR of 4.8%. The antiemetics and antinauseants market is driven by the increase in the prevalence rate of cancer.

## Key Trends In The Antiemetics And Antinauseants Market

Manufacturers are exploiting nanotechnology in the antiemetics and antinauseants market to deliver therapeutic agents to specific targeted sites in a controlled manner through Nano medicine and Nano delivery systems. Nano medicine is the medical application of nanotechnology which uses nanoparticles to enhance the action of the drug in treatment and nanotechnology is the design, characterization, production, and application of devices, structures and systems by controlled manipulation of size and shape at the nanometer scale. The antiemetic and antinauseant drugs manufacturers are inclining more towards the use of Nano medicine or Nano drug to make the drug effective and increase their revenues.

## Overview Of The Antiemetics And Antinauseants Market

The antiemetics and antinauseants market consists of sale of antiemetic and antinauseant drugs and related services. Antiemetic and antinauseant drugs prevent, control or treat, nausea and vomiting caused in general or by other medications, frequent motion sickness, infections, stomach flu or chemotherapy. These drugs block signal messages to the part of the brain that controls nausea and vomiting thus reducing the symptoms of nausea or vomiting.
