The key highlights of the report include:

Market Overview (2017-2027)

Historical Market Size (2021): USD 37 Billion

Forecast CAGR (2022-2027): 5.3%

The growth of the global medical education market has been driven by the rising technological advancements, the rising demand for advanced and online education. The global market has been dominated by North America in the historical period of 2017-2021 owing to the increased

adoption of advanced and upgraded technology in the medical education sector.

The increased enrolment in the medical education sector also contributed significantly to the growth of the regional industry in the historical period. On the other hand, Asia Pacific is likely to be among the fastest growing regions in the medical education industry. The expected growth can be attributed to the rise of advance technologies that are being used for the industry and the rising urbanisation in the region.

Industry Definition and Major Segments

Medical education refers to the course of study that is concerned with educating the people who want to be doctors. The course imparts the knowledge and skills necessary for illness prevention and treatment. It also establishes strategies and objectives for researching the elements that cause sickness or promote well-being.

School of Medicine

Government/Military Organisations

Hospital

Insurance and Company

Non-Profit Organisation

Publishing or Education Company
Others

The EMR report looks into the regional medical education markets like:

North America
Latin America
Asia Pacific
Europe
Middle East and Africa

Market Trends

The increased demand for online learning has stemmed from the growing requirement to create a system that not only boosts medical professionals' knowledge but also allows them to stay current with contemporary developments in the medical sector. Digitalisation has helped to open a slew of new opportunities for the global medical education business. Universities are introducing innovative teaching methods such as practical based approaches, evidence-based medicine (EBM), problem-based learning (PBL), and hands-on engagement and training with patients to enhance their medical knowledge, rather than traditional discipline-based curriculums.

Medical education on the internet is anticipated to increase because it provides unique access to new study methods such as pace customisation and interactive learning via videos and audios, all of which are cost-effective. Furthermore, continuing medical education (CME) promotes lifelong learning by assisting medical professionals in filling gaps in their professional practice, which is likely to contribute to market growth throughout the forecast period.

Key Market Players

The major players in the market are Harvard Medical School, University of Oxford, University of Cambridge, Stanford Medicine, Gundersen Health System, Koninklijke Philips N.V., Siemens Healthcare Private Limited, Zimmer Pvt. Ltd., and Olympus America, among others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
