The aviation asset management market consists of sales of aviation asset management services by entities (organizations, sole traders, and partnerships) used for cost savings, improving productivity, and reducing ownership costs within the airport. Aviation asset management refers to a programmatic method of proactively managing and maintaining aircraft across each aircraft's useful life, from initial acquisition to final disposition.

[Global Aviation Asset Management Market Trends](#)

Technological advancement is a key trend gaining popularity in the aviation asset management market. Major companies in the aviation asset management market are focusing on new technologies to develop advanced asset management software solutions to strengthen their position in the market. For instance, in 2022, flydocs, a UK-based asset management solution provider, partnered with SGI Aviation Services, a Netherlands-based aviation asset management company, to develop a financial asset management software solution to cater to a diverse range of aviation asset owners through flydocs' digitised asset management tools, maximising the
