NEW YORK CITY, NEW YORK, UNITED STATES, September 6, 2022

/EINPresswire.com/ -- Electric vehicles are becoming increasingly popular, and with that comes the need for better infotainment systems. These systems need to be able to keep drivers entertained and informed while on the road. There are many different options available, and each has its own set of features. It is important to choose an infotainment system that will meet the needs of the driver and passengers. With the growing focus on sustainability and the need to reduce greenhouse gas emissions, the [electric vehicle infotainment market](#) is expected to grow significantly in the coming years. Electric vehicles are becoming more popular as consumers look for ways to reduce their environmental impact. Infotainment systems in electric vehicles help drivers stay connected and entertained while on the road.

The global electric vehicle infotainment market was valued at USD 1.62 billion in 2021. It is expected to grow at a CAGR of 37.2% between 2023 and 2032. This growth is being driven by the increasing adoption of electric vehicles, the need for advanced infotainment features, and the growing demand for connected car services.

Consumers are adopting electric vehicles more often than ever before. The market is also growing due to the increasing demand for GPS-enabled infotainment devices. The system allows traffic monitoring, mapping, and location tracking functions. This has increased the functionality of this infotainment system. The market is also being driven by the increased use of wireless connectivity and the EV infotainment systems at a low price. In order to increase control and engagement, manufacturers are incorporating integrated centers stacks into their EVs.
