

CAGR of 8.5%, Energy-as-a-Service Market Strategies [+Sales Growth], Factors and Forecast 2031

Global energy as service market value was USD 62.36 billion in 2021. This market is expected to grow at a CAGR of 8.5% between 2023-2032.

NEW YORK CITY, NEW YORK, UNITED STATES, September 6, 2022 /EINPresswire.com/ -- As our world increasingly moves away from traditional forms of energy generation and towards renewable sources, the way we purchase and consume energy is also changing. [Energy-as-a-Service \(EaaS\)](#) is a new model for procuring

and managing energy that is becoming more popular with businesses and organizations. In the EaaS model, instead of purchasing energy from a utility company or other supplier, businesses contract with an energy service provider (ESP) for a certain amount of energy each month.

The energy-as-a-service market is expected to grow significantly in the next few years. This growth is being driven by the increasing adoption of renewable energy sources, the need for improved energy efficiency, and the growing demand for electric vehicles. The energy-as-a-service market includes a wide range of services, such as energy storage, power generation, demand response, and energy efficiency. These services are provided by a variety of companies, including utilities, developers, and manufacturers.

The growing adoption of renewable energy sources is one of the major drivers of the energy-as-a-service market. Renewable energy sources such as wind and solar PV are becoming increasingly cost-competitive with traditional fossil fuels. As a result, more utilities and developers are turning to renewables to meet their power needs. Another driver of the market is the need for improved energy efficiency.

Increased distribution of energy resources and new revenue streams for utilities are the key factors behind the growth in the energy as service market. In the near future, the demand for electricity as a service will grow due to the decrease in cost of renewable power generation and storage and the increased use of energy-efficiency technology.

Recent Developments

Ameresco signed a long-term, energy as a services (EaaS), agreement with Northwestern University in July 2022. The partnership will enable the institution to address its energy related deferred maintenance problems with no upfront capital and advance its sustainability and academic goals.

Ameresco signed a long-term, energy as a services (EaaS), agreement with Northwestern University in June 2022. The partnership will enable the institution to address its energy related deferred maintenance problems with no upfront capital and advance its sustainability and academic goals.

Advantages of this Research:

#1: Determine market share for "Energy-as-a-Service" market opportunities. Track market size, competitive sales, market insights for commercial development, and licensing.

#2: Create strategies and tactics to capitalize on opportunities in the "Energy-as-a-Service" market.

#3: Latest Trends, Market Events and analyze essential events in Energy-as-a-Service market.

#4. Develop an in-depth knowledge of competition and analyze sales data to update your brand planning trackers.

#5. Answer vital business questions; supports decision making in R&D to long term marketing strategies.

#6: Develop economic models, forecast models frameworks.
