

Ovarian Cancer Awareness Month Supported by iData Research Global Publications

VANCOUVER, BRITISH COLUMBIA, CANADA , September 6, 2022

[/Einpresswire.com/](https://www.einpresswire.com/) -- iData Research, a global consulting and market research firm, is participating in supporting and increasing appreciation for Ovarian Cancer Awareness Month. According to Canadian Cancer Statistics (2020), thousands of women are living with ovarian cancer in Canada. It is estimated that this year 3,100 Canadian women will be newly diagnosed with this disease. Ovarian cancer is the 5th most common cancer for women and is the most serious women's cancer. Each September, Ovarian Cancer Awareness Month designates 30 days to raising awareness about ovarian cancer, sharing information and resources, while honoring those patients, survivors, caregivers and medical professionals impacted.

In support, iData is making its sought-after gynecology market research reports more affordable and accessible by large and small companies alike, as well as agencies and academia, during this September with related charity contributions for every dollar spent. The reports are as follows:

- Gynecological Devices Market Size, Share & COVID19 Impact Analysis | Global | 2021-2027 | MedSuite | Includes: Assisted Reproduction Technology, Endometrial Ablation, Gynecological Resection, Uterine Tissue Removal, Uterine Fibroid Embolization, Hysteroscope, Colposcope, POP Repair & Fluid Management Devices
