[Key Trends In The Sporting And Athletic Goods Market](#)

Additive manufacturing is growing as an important trend as the sports goods industry has become competitive. Additive manufacturing involves building three dimensional objects using digital models by successively adding multiple layers of material. The sports goods industry has fast-changing customer demands and requirements in product performance. Additive manufacturing enables the manufacturer to fulfil those demands by providing an efficient approach to rapid prototyping. Therefore, a manufacturer can produce a specific design depending upon the individual's prototype.

[Overview Of The Sporting And Athletic Goods Market](#)

The sporting and athletic goods market consists of sales of sporting and athletic goods by entities (organizations, sole traders and partnerships) that produce sporting and athletic goods, except clothing and footwear.
