

# Nigeria Neuropathic Pain Management Drugs Market to Surpass US\$ 10.1 Million by 2028 | Pfizer Inc., Novartis AG

*Neuropathic pain is a complex, long-term pain condition that is frequently accompanied by tissue damage.*

SEATTLE, WASHINGTON, UNITED STATES, September 7, 2022  
/EINPresswire.com/ -- Market Overview:

Neuropathic pain is often described as a shooting or burning pain. It can go away on its own but is often chronic. People with neuropathic pain are often very sensitive to touch or cold and can experience pain as a result of stimuli that would not normally be painful, such as brushing the skin. It's usually caused by chronic, progressive nerve disease, and it can also occur as the result of injury or infection. Receiving care as soon as possible may help prevent and/or lessen problems that often accompany neuropathy. Drugs recommended for neuropathic pain include amitriptyline (used to treat depression and headaches), duloxetine (used to treat depression and bladder problems), and pregabalin & gabapentin (used to treat anxiety, headache, or epilepsy). Second- and third-line drugs for neuropathic pain include topical lidocaine and opioids.

## Competitive Landscape:

Major players operating in the [Nigeria neuropathic pain management drugs market](#) are Pfizer Inc., GlaxoSmithKline Plc, Novartis AG, and Biofemgroup Ltd., among others.

## Key Market Drivers:

High prevalence of cancer in Nigeria is expected to boost the growth of the Nigeria neuropathic

pain management drugs market during the forecast period. For instance, according to the World Health Organization (WHO), in 2020, around 124,815 new cases of cancer were registered in Nigeria (around 51,398 men and 73,417 women).

Moreover, increasing prevalence of diabetes in Nigeria is expected to augment the growth of the Nigeria neuropathic pain management drugs market. For instance, Nigeria is one of the 48 countries of the International Diabetes Federation (IDF) African region. More than 537 million people have diabetes in the world and 24 million people in the AFR Region, and the number is expected to reach around 55 million by 2045.

#### COVID-19 Impact Analysis:

As COVID-19 often causes central or peripheral neurological complications, it is predicted that many chronic pain complications associated with COVID-19 will be neuropathic. Neuropathic pain may be caused indirectly by COVID-19 (SARS-CoV-2) after ICU treatment. This in turn is expected to increase demand for neuropathic pain management drugs across the globe, driving the growth of the market.

#### Key Takeaways:

The Nigeria neuropathic pain management drugs market is expected to exhibit a CAGR of 3.2% during the forecast period due to the increasing demand for drugs for the treatment of neuropathic pain. For instance, in October 2017, Pfizer Inc. received the U.S. Food and Drug Administration (USFDA) approval for LYRICA CR for the treatment of neuropathic pain related to diabetic peripheral neuropathy.
