

Secured Communications Launches its Global Social Responsibility Initiative

Offering Special Grant Program for Law Enforcement and Related

RENO, NV, USA, September 7, 2022 /EINPresswire.com/ -- [Secured Communications](#) is the global leader in safeguarding communications. Following the global launch of its premier, fully encrypted unified communications and collaboration (UCC) platform [Mercury Workspace](#) in London this May, the company now announces the launch of its [Global Social Responsibility](#) Initiative and grant program for qualifying agencies and organizations.

Dave Martin, Director of Global Social Responsibility

This initiative and grant program is led by former New Scotland Yard Commander, Dave Martin, the Director of Global Social Responsibility for Secured Communications. The company is giving back to the foundation that it was built on by embracing its responsibility to offer Mercury Workspace technology for law

“

Helping the world to communicate securely is in our DNA. We will never lose sight of our roots in law enforcement and global security, and we are proud to support their efforts.”

Dave Martin, Director of Global Social Responsibility

enforcement purposes, public safety and non-profit organizations that are working hard to keep people safe across the globe. Through its Global Social Responsibility grant program, the company is offering special rates for the use of Mercury Workspace to eligible agencies and organizations.

When asked about the Global Social Responsibility grant program, Dave Martin said, “Helping the world to communicate securely is in our DNA. As our company expands across the world, we will never lose sight of our roots in law enforcement and global security, and we are

proud to support their efforts.”

Secured Communications was developed in partnership with former senior FBI and global law enforcement leaders and has been trusted by counterterrorism professionals, security professionals and corporations worldwide for the past six years. The company held its global product launch following its utilization as the official communications platform by the world's leading counter terrorism conference (LinCT) whose membership includes top counter terrorism and security professionals from the 5 Eyes countries.

The Mercury Workspace UCC platform includes fully encrypted messaging, file sharing of unlimited size, HD video conferencing and VoIP calling, all secured in one closed ecosystem, using the world's first and most complete implementation of messaging layer security (MLS) to protect every message and multi-factor authentication (MFA) techniques to verify user identity.

Secured Communications' first Global Social Responsibility partner, INVICTM, is an international network of trusted experts dedicated to improving support for victims of terrorism and mass violence. Sue O'Sullivan, INVICTM Chair, had this to say about Mercury Workspace, "The strength of INVICTM lies in the ability to share lessons learned, leverage the knowledge and expertise of its members and their networks; to influence change and turn research into action within our own countries and globally. Mercury offers us the perfect solution with its trusted platform and collaboration tools, giving us the confidence to use it even in the most sensitive circumstances."

Secured Communications prides itself on being a socially responsible company dedicated to improving security measures both near and far. Through the Global Social Responsibility grant program, Secured Communications is proud to offer special rates for the use of Mercury Workspace to eligible agencies and organizations.

Notes to Editors:

The image displays the Mercury Workspace logo at the top, featuring a stylized 'M' icon and the word 'MERCURY' in large, bold, pink letters. Below the logo, it says 'POWERED BY SECURED COMMUNICATIONS'. The central part of the image shows a screenshot of the Mercury Workspace interface on a laptop and a smartphone. The laptop screen displays a video conference with multiple participants, a chat window on the left, and a navigation bar at the bottom. The smartphone screen shows a messaging interface with a list of messages and a video call in progress. Below the interface, there are five pink icons representing different communication features: a group of people, a speech bubble, a document with a checkmark, a telephone handset, and a video camera. At the bottom of the image, the text 'Mercury Workspace Powered by Secured Communications' is written in a clean, sans-serif font.

Secured Communications is the global leader in safeguarding communications. Developed in partnership with former senior FBI and global law enforcement leaders, the company's suite of products protects information with the most advanced and intuitive encrypted solutions. Its platform is trusted by counterterrorism professionals, public safety agencies and vetted corporations worldwide.

Mercury Workspace, powered by Secured Communications, is How Smart Business Communicates. Its unified communications and collaboration (UCC) platform includes fully encrypted messaging, file sharing of unlimited size, HD video conferencing, and VoIP calling, all secured in one closed ecosystem using the world's first and most complete implementation of messaging layer security (MLS) and multi-factor authentication (MFA) techniques to verify user identity and to protect data.

Secured Communications views its clients as partners and offers first class personalized support in addition to providing customization services and integrations to help them manage their most sensitive communications and stay in control of vital information.

Secured Communications prides itself on being a socially responsible company dedicated to improving security measures both near and far. Our Global Responsibility Initiative is founded on a grant program that expands our commitment to law enforcement purposes, public safety and non-profit organizations that are working hard to keep people safe across the globe.

Online demonstrations of the new technology are available to businesses and organizations globally at: <https://securedcommunications.com/requestdemo.html>.
