towards seniors becomes of paramount importance. One aspect of the Tranquility Lifestyle Solutions technology platform that is delivered via its LIBERATE product, is a service designed to promote wellbeing. Therefore, employing Photavia's videos, designed to promote cognitive engagement and the therapeutic benefits of art, allows for TLS to effectively penetrate the market and in turn, boosts the distribution avenues that Photavia is able to access." – Andy Furlong, CEO of Tranquility Lifestyle Solutions.

Liberate has been built with everyone in mind. For the elderly audience, our devices are user-friendly. For caregivers and other family members, our solutions offer an elevated sense of control obtained via real-time monitoring and reporting. The systems

"We are biting at the bit to start working with Andy and the Tranquility team" says Joe Hausch, President, and CEO of Photavia. "I keep saying that we just can't get the good news out fast enough. And now, our wonderful new relationship with Tranquility helps us on our journey to change the world and improve the [quality of life for seniors and their families](#) - with an organization that shares our passion and approach."

Andy Furlong continued, "We are so excited to develop and nurture this collaboration as we address numerous possibilities within this important field. At Tranquility Lifestyle Solutions our focus is all about senior care, senior well-being, and senior lifestyle enhancement. Therefore, when we were introduced to Photavia and their ideologies, we knew that the concept of their product was right for us and that by joining forces, we would strive to empower not only each other, but all of the seniors and their families that we wish to serve."

#### About TLS:

Tranquility Lifestyle Solutions provides a technology platform that serves both seniors and their caregivers right in the palm of their hands. It is a technology system that links 4D radar sensors to the internet within a senior's home environment and then pairs them with the mobile devices of family members and caregivers. The system covers multiple areas of senior wellbeing from fall detection to vital sign monitoring through to numerous safety sensors. Their unique approach requires no cameras or listening devices, no wearables and above all, no personal activation. It is a service that ensures privacy and dignity for seniors, alongside of a mindful watchfulness for family members. The algorithms that the TLS platform has put into process sends alerts to the mobile devices of appointed guardians within 90 seconds of an abnormality being detected. This ensures that help can be dispatched in a timely fashion and allows all concerned to be secure in the knowledge that both protectors and those protected, are actively safe with freedom from

anxiety.
