

Segue Manufacturing Services to Showcase Medical and Regulatory Expertise at BIOMEDevice Boston 2022

Medical Electronics Manufacturing Integration Specialist joins leading Medtech lineup as premier Medical conference returns to East Coast

BOSTON, MASSACHUSETTS, USA, September 9, 2022 /EINPresswire.com/ -- [Segue Manufacturing Services, a global contract electronics manufacturer](#) specializing in custom electromechanical, cable assembly and engineering services for the Medical sector, will be featured at Booth 322 as BIOMEDevice Boston returns for 2022.

One of the premier events in the Biomedical and Medical Device industry, BIOMEDevice Boston will showcase thought leaders, emerging technology, and global medical and tech trends in its anticipated return on September 28-29 at the Boston Convention & Exhibition Center.

Segue Manufacturing Services Boston Operations Center, Medical Specialists

“

For the Medical Device industry, this long-term state of ‘unprecedented change’ brings fatigue but also innovation, which is where Segue Manufacturing can really help.”

Scott Manty, VP Sales & Marketing

Boston-headquartered [Segue Manufacturing Services is a Medical Device specialist](#) and 30-year veteran of the contract electronics manufacturing industry, delivering Medtech from portable ventilators, to large-format sterilizers, to first-to-market healthcare technology, to Medical OEMs and Tier I EMS providers around the globe. With manufacturing operations in Billerica, MA and Xiamen, China, and a 3PL in Monterrey, Mexico, Segue’s specialist expertise in manufacturing and engineering Medical Devices is proven to accelerate the ramp from NPI to volume manufacturing.

“Global supply chains are more burdened than ever, while also being replicated and remediated as turbulent conditions prevail and technology leaders look for new ways to reduce liability and

improve hardware quality and delivery for a changing marketplace. For the Medical Device industry, this long-term state of 'unprecedented change' brings fatigue but also innovation, which is where Segue Manufacturing can really help," said Scott Manty, Segue's VP of Sales & Marketing.

"Segue's Boston Manufacturing Center with its NPI Center of Excellence excels in everything 'complex Medical', including electromechanical systems integration and fulfillment, complex cable and wire harness, and our unparalleled program flexibility. Combine that with our ability to provide redundancy and supply chain continuity through our China operation and Asia-specific supply chains, and we're able to offer our customers the ultimate supply and fulfillment solution while exceeding FDA and other regulatory requirements."

Segue Manufacturing - Molded Medical Cable Expertise

Segue Manufacturing - Medical Device Expertise

At BIOMEDevice Boston, Segue Manufacturing Services will be exhibiting its latest capabilities in complex Medical Device manufacturing and engineering services, including regulatory solutions for OEMs that must comply with the USA Food and Drug Administration (FDA) requirements for Class I, Class II and Class III devices.

Taking place on September 28-29, BIOMEDevice Boston is a direct response to the Medical industry's ever-changing landscape, helping companies improve the ways in which they harness the power of technology and digital solutions that result in more efficient, accurate, and lower-cost medical devices. This year's conference sessions include themes such as 3D printing and robotics, digital health, cybersecurity and the Medtech investment landscape.

OEMs and Tier I EMS interested in arranging an appointment with Segue in advance of the show should contact:
