# New axledit panel offers direct sequence export to Adobe Premiere Pro

IBC Hall 7 D20 - Other key features of new release include the ability to catalog existing cloud and on-premise storage pools, and localized user interfaces

AMSTERDAM, NETHERLANDS, September 8, 2022 /EINPresswire.com/ -- Axle AI has launched a new panel for Adobe® Premiere® Pro allowing seamless export of axledit sequences to the class-leading Adobe video editor. Version 1.2 of Axle's revolutionary axledit cloud-native MAM

axledit Premiere panel with clip and comments

with integrated video editor is making its IBC debut at the Global Distribution stand, Hall 7.D20.

axledit's unique collaboration features allow not only browser-based review and approval by producers and clients, but also simultaneous editing sessions with a shared view of the current state of the timeline and playback. This capability is especially important in a world where remote work has become not only accepted, but the overwhelming choice of content professionals industry wide.

> "
> Until now, MAMs have only exported clips to Premiere Pro; with axledit 1.2 they can collaboratively create full sequences in the MAM, and bring them as well as the associated clips into Premiere Pro."
> *Sam Bogoch, CEO, Axle AI*

Sam Bogoch, CEO of axle ai, said "This panel represents a new level of integration between MAMs and desktop editing applications. It represents the culmination of our collaboration with Adobe over the years. Previously, the best MAM users could hope for was to export clips to Premiere Pro, but with axledit 1.2 they can now collaboratively create full sequences in the MAM, and bring them as well as the associated clips into Premiere Pro."

Other key features of the new axledit 1.2 release include:
1.Multi-language user interface - initially Spanish, French and German front ends with more languages expected over the coming months

2.Ability to catalog external S3-compatible data storage pools, including Amazon S3, Seagate Lyve Cloud and Global Distribution's new Symply Object storage

3.Integrated speech transcription for affordable, quick location of key moments in video clips

Support for automated workflows with no-code graphical setup, via the axle connector workflow tool.

Other key axledit capabilities include:

• Professional-style timeline with multiple audio and video tracks

• High speed, interrupt-resilient uploads of huge video files

• Effects and transitions

• Powerful sequence versioning

• The ability to directly import stock video content

• Access to axle ai on-premise and cloud media management servers
