The referral management market consists of sales of referral management services by entities (organizations, sole traders, and partnerships) that are used in health systems to reduce patient leakage, improve care coordination, and also provide patients with the care they need. Referral management refers to the process of moving patients to the next level of care. This transition frequently happens when a patient is facing a crucial situation, such as an increase in care or a change in diagnosis.

[Global Referral Management Market Trends](#)
