COVID-19 Impact Analysis:

The outbreak of COVID-19 has escalated the cervical cancer diagnostic tests, more so as the WHO has certified that those suffering from chronic diseases like cancer, diabetes are more likely to contract Corona. These patients are trying to be doubly sure about the complexities, so that utmost care could be taken amidst the ongoing pandemic. The market for cervical cancer diagnostic tests is not expected to stand still by any means, looking at the situation on the whole.

Growth Factors:

The global cervical cancer diagnostic test market is significantly driven by the rise in percentage of HPV in female population. Lack of hygiene and non-awareness of cervical cancer in women is one of the significant factor to boost the need for cervical cancer diagnostic tests in women. According to CDC, more than seven million people acquire HPV in the U.S. Besides, change in lifestyle, availability of medical support is expected to propel the market growth. Genetic causes in women is also anticipated to contribute to the market growth in the coming years.
