“Jenny’s honest approach to her writing takes you straight into the emotional rollercoaster of infertility and how we have to manage this overwhelming and invasive life experience as life just goes on. The calls keep coming delivering more bad news, that you just have to take in your stride and carry on. Jenny takes you on the journey through her and James’ experience of dealing with such news, that is all so unfair, and she manages to share all this in such a caring and compelling way that you can’t put the book down. Her story is one of such resilience and I know it will help so many people, so thank you Jenny for sharing.”

—Natalie Silverman, founder of The Fertility Podcast, co-founder of Fertility Matters at Work

“The vulnerability that Jenny shows by taking us on her raw but ‘hopeful’ journey to become a mother and create a family for her and her husband reminds us that nothing should be taken for

granted. It's safe to say that we have all been touched by infertility at some point, but this book reminds us that it can happen to anyone and that if and when it does you are not on an island alone dealing with it. The power of Jenny's story is proof that we are all stronger than we think."
