#### Segmental Analysis:

1. A primary dressing directly contacts the wound. It also provides absorptive capacity and thus prevents desiccation, infection, and adhesion of the secondary dressing to the wound. The primary dressing contains plain gauze, impregnated gauze, and film dressings. This gauze has been used to debride exudative, infected, and necrotic wounds. The surging benefits of primary dressing are propelling the growth of the Primary Dressings segment.

2. A secondary dressing is placed over a primary dressing, providing further protection, absorptive capacity, compression, or occlusion. The secondary dressing contains absorbent surgical cotton. The soaring application of conventional wound dressing products like gauze, lint, plasters, and more as secondary dressings for safeguarding the wound from infections is fueling the growth of this segment.

3. Heightened count of ambulatory surgical centers in conjunction with advantages like surgical procedures being conducted at a more economical rate and the patients not being required to stay overnight are fueling the growth of the Ambulatory Surgical Centers segment.

4. According to the Centers for Disease Control and Prevention (CDC), more than 37.3 million Americans suffered from diabetes by 2020. Furthermore, a variety of companies offer a wide range of surgical dressings, increasing their availability in various healthcare facilities and therefore boosting the growth of the Absorbent & Packing Gauze Surgical Dressings Market.

#### Competitive Landscape:

The top 5 players in the Absorbent & Packing Gauze Surgical Dressings industry are -

1. Healthium Medtech Limited

2. Axio Biosolutions

3. Cardinal Health

4. Essity

5. 3M
