The global pharmacy automation system market size was valued at \$5001 Million in 2020, and is assessed to reach \$11211 Million by 2030, growing at a CAGR of 8.3% from 2021 to 2030.

Under product type, the automated medication dispensing part addressed the largest share of pharmacy automation market in 2020. The gigantic share of the segment is credited to benefits such as prevalent medication security, better inventory load up, and further created storage limit with ideal utilization of room, and conceivable time & cost savings.

Key Findings of the Study

By product, the automated medication dispensing systems segment accounted for nearly half the share of the pharmacy automation system market in 2020.

Region wise, Asia-Pacific is anticipated to grow at the highest CAGR of 10.4% throughout the forecast period.

In Europe, Germany accounted for approximately one-fourth share of the pharmacy automation system market, in 2020.

By end user, the retail segment accounted for less than one-third share of the global pharmacy automation market in 2020.
