

Global Mechanical Thrombectomy Devices Market worth \$ 2.27 Billion by 2030 - Exclusive Report by Insightace Analytics

Global mechanical thrombectomy devices market was valued at US\$ 1.26 Billion in 2021. It is expected to reach US\$ 2.27 Billion by 2030

NEW JERSEY, NJ, USA, September 9, 2022 /EINPresswire.com/ -- Insightace Analytics Pvt. Ltd. announces the release of a market assessment report on the "[Global Mechanical](#)

[Thrombectomy Devices Market](#)- by Product Type (Coil Retriever Devices, Stent Retriever Devices, Aspiration Devices, Manual Thrombectomy

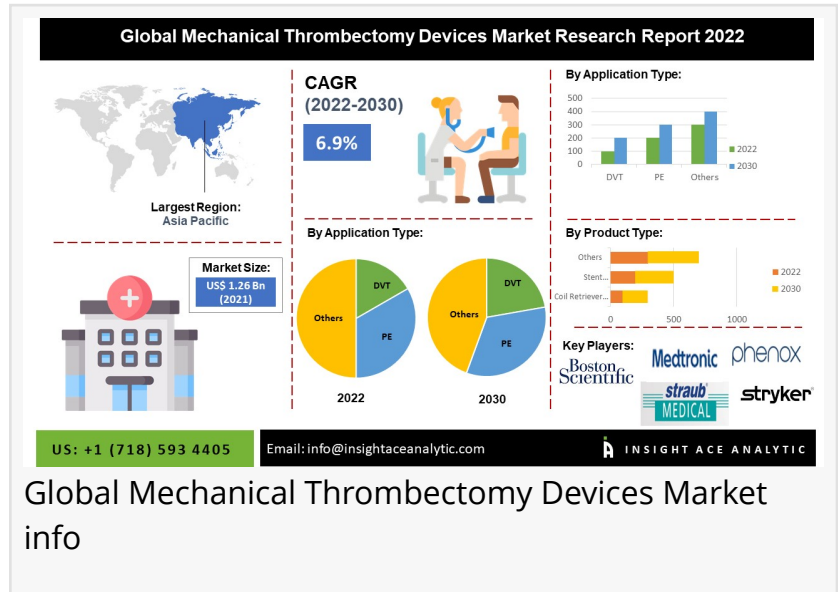

Devices and Others (Ultrasound Based Devices)), Application Type (Stroke, Deep Vein Thrombosis (DVT), Pulmonary Embolism (PE), Arteriovenous fistula (AVF), Peripheral Arterial Disease (PAD), Haemodialysis Treatments, Percutaneous coronary intervention (PCI) and Others), End-User (Hospitals, Ambulatory Surgical Centers, Specialty Clinics and Academic & Research Institutes), Trends, Industry Competition Analysis, Revenue and Volume Forecast To 2030."

Major market players operating in the Mechanical Thrombectomy Devices market include Boston Scientific Corporation, Straub Medical AG, AngioDynamics, Acandis GmbH, NIPRO, Medtronic, MicroVention, Inc"

Insightace Analytic

forecast period of 2022-2030.

According to the latest research by Insightace Analytics, the global [mechanical thrombectomy devices](#) market was valued at US\$ 1.26 Billion in 2021. It is expected to reach US\$ 2.27 Billion by 2030, with a CAGR of 6.9 % during a

An interventional radiologist will use specialized equipment to perform a mechanical thrombectomy, a minimally invasive procedure, to remove a clot from a patient's artery. A mechanical thrombectomy device removes clots from a vein during an interventional procedure. It is typically only employed as a last option since continuous obstruction of blood flow to organs might result in a condition called necrosis. These tools will minimize the damage to the vessel wall during surgery. According to the size and distance across and depending on the damaged location, thrombectomy devices are also used to treat pneumonic embolism, deep vein thrombosis, neurovascular thrombosis disorders, and peripheral blood vessels. The most frequently used mechanical thrombectomy techniques are balloon embolectomy, aspiration embolectomy, and surgical embolectomy.

The usage of thrombectomy in surgical facilities and hospitals is projected to be driven by the use of clot retrievers and stents to treat strokes and an increase in the number of vascular disorders. The manufacturers' increasing investment in R&D activities to provide top-notch thrombectomy devices will also fuel the expansion of the global mechanical thrombectomy device market. The market is also being driven by the growing elderly population and the rising demand for minimally invasive (MI) operations and bettering healthcare systems worldwide. Additionally, the top manufacturers are investing more money in R&D projects to produce mechanically advanced thrombectomy devices because of the growing rivalry, which is good news for the industry. In addition, favourable clinical reimbursements and experts' increasing preference for using these devices for image-guided medical operations are anticipated to support market growth. However, the lack of skilled professionals and the challenging nature of using these devices limit the market growth. The high cost of thrombectomy equipment is impeding market expansion. Additionally, the lack of knowledge regarding peripheral vascular diseases in developing nations hinders market growth.

North America is anticipated to majorly contribute to the mechanical thrombectomy devices market over the forecast years because several technologically advanced and innovative mechanical thrombectomy devices are nearby. The growth of the North American mechanical thrombectomy devices market is being driven by factors such as the growing use of technologically advanced thrombectomy products among specialists, the rising number of clinical preliminaries and clinical repayments available for thrombectomy systems in the U.S. In addition, the Asia Pacific mechanical thrombectomy devices market is expected to grow significantly during the forecast period due to the increase in cardiovascular illnesses, rising healthcare costs, and gadget technical improvements. The market segment's expansion in this

area will be fueled by the rising use of mechanical thrombectomy procedures and medical reimbursement services provided by various central governments.

Major market players operating in the Mechanical Thrombectomy Devices market include Boston Scientific Corporation, Straub Medical AG, AngioDynamics, Acandis GmbH, NIPRO, Medtronic, MicroVention, Inc., Medrad Inc. (Bayer HealthCare LLC), Johnson & Johnson, Rapid Medical Inc., and Anaconda Biomed SL, Imperative Care Inc., Stryker Corporation, Phenox GmbH, Penumbra, Inc., Balt Extrusion, Vascular Medcure, Inc., and Others.

Recent collaborations and agreements in the market:

- In February 2022, Zoom POD Aspiration Tubing, Imperative Care, Inc.'s most recent advancement in improving stroke care, was introduced. The company's Zoom Stroke Solution's newest innovation enables speedy confirmation of clot retrieval success during mechanical thrombectomy for ischemic stroke.
- In October 2021, To treat acute large vessel occlusive (LVO) stroke, phenox developed the pRESET 6-50 mechanical thrombectomy device.

Market Segments

Global Mechanical Thrombectomy Devices Market, by Product Type, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Coil Retriever Devices
- Stent Retriever Devices
- Aspiration Devices
- Manual Thrombectomy Devices
- Others (Ultrasound Based Devices)

Global Mechanical Thrombectomy Devices Market, by Application Type, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Stroke
- Deep Vein Thrombosis (DVT)
- Pulmonary Embolism (PE)
- Arteriovenous fistula (AVF)
- Peripheral Arterial Disease (PAD)
- Haemodialysis Treatments
- Percutaneous coronary intervention (PCI)
- Others

Global Mechanical Thrombectomy Devices Market, by End-User, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Hospitals

- Ambulatory Surgical Centers
- Specialty Clinics
- Academic & Research Institutes

Global Mechanical Thrombectomy Devices Market, by Region, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East & Africa

North America Mechanical Thrombectomy Devices Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- U.S.
- Canada

Europe Mechanical Thrombectomy Devices Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Germany
- France
- Italy
- Spain
- Russia
- Rest of Europe

Asia Pacific Mechanical Thrombectomy Devices Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- India
- China
- Japan
- South Korea
- Australia & New Zealand

Latin America Mechanical Thrombectomy Devices Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Brazil
- Mexico
- Rest of Latin America

Middle East & Africa Mechanical Thrombectomy Devices Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- GCC Countries

- South Africa
- Rest of Middle East & Africa

Why should buy this report:

- To receive a comprehensive analysis of the prospects for the global Mechanical Thrombectomy Devices market
- To receive an industry overview and future trends in the Mechanical Thrombectomy Devices market
- To analyze the Mechanical Thrombectomy Devices market drivers and challenges
- To get information on the Mechanical Thrombectomy Devices market value (US\$Mn) and Volume (No. of Units) forecast to 2030
- TO get information on investments, mergers & acquisitions in the Mechanical Thrombectomy Devices market industry
