

# PEBA-Ester Market Revenue, Major Players, Consumer Trends, Analysis & Forecast Till 2027 – IndustryARC

*PEBA-ester market size is forecasted to reach US\$1,401.3 million by 2027 after growing at a CAGR of 4.2% during 2022-2027*

HYDERABAD, TELANGANA, INDIA,  
September 12, 2022 /

EINPresswire.com/ -- The [PEBA-ester](#)

[market](#) size is forecasted to reach US\$1,401.3 million by 2027 after growing at a CAGR of 4.2% during 2022-2027. Polyether block amide (PEBA) is thermoplastic elastomers and is a block copolymer, usually made up

of materials such as rigid polyamide and flexible polyether. These elastomers are flexible, lightweight, and possess good chemical properties, making them suitable for a wide range of applications. PEBA esters are used extensively in the electrical and electronics industry where they are utilized in the manufacturing of products such as smartphones, flexible screens, wearable devices, cables, and several other electronic items.

## Key Takeaways:

This IndustryARC report on the PEBA-Ester Market highlights the following areas -

1. Soft PEBA elastomer is leading the market. This type of PEBA-ester comes with good elasticity and excellent abrasion resistance, making it a suitable option in the market.
2. The increasing demand for electronic products is projected to drive the market's growth during the forecast period. According to the October 2020 stats by Consumer Technology Association, smartphone sales will rise in 2022 with 76% of all smartphones anticipated to have 5G capabilities in 2022.
3. The Asia-Pacific region is expected to witness the highest demand for PEBA-esters owing to

Market Research Reports, Business Consulting  
Services & Analytics

the expanding electronics market in the region. For instance, according to the July 2021 report by China.org.cn, South Korea's exports of consumer electronics had a growth trajectory for 12 months in a row.

#### Segmental Analysis :

1. Soft PEBA elastomer dominated the PEBA-ester market in 2021 and is expected to grow at a CAGR of 4.6% during the forecast period. This type of ester comes with a low compression set, robust electrical properties, and high resistance to solvents, greases, and oils.
2. The electrical and electronic sector dominated the PEBA-ester market in 2021 and is projected to grow at a CAGR of 5.2% during the forecast period. The block copolymer is used massively in the manufacturing of several electronic products and components such as wires, smartphones, flexible screens, and wearable devices.
3. The Asia-Pacific region held the largest market share in the PEBA-ester market in 2021, up to 32%. The high demand for PEBA-ester is attributed to the massive growth in the region's electronic sector. The thermoplastic elastomer material is widely used in the manufacturing of numerous electronic products ranging from smartphones to wearables and cables.

#### Competitive Landscape:

The top 5 players in the PEBA-Ester industry are -

1. Arkema
2. Evonik
3. EMS-GRIVORY
4. UBE
5. BASF SE

#### Why Choose IndustryARC?

IndustryARC is one of the leading market research and consulting firms in the world. It produces

over 500 unique market reports annually. If you are looking for a detailed overview of a particular market, you can simply connect with the team at IndustryARC. You can not only buy your preferred market report from the website, but also get personalized assistance on specific reports.
