[Key Trends In The Unfinished Paper Market](#)

Manufacturing in paper mills is getting faster and leaner with the adoption of sensor and wireless technologies. Sensors are generating insights for improving process efficiencies and reducing potential breakdowns. Wireless technology is aiding the implementation of sensor technology in manufacturing units.

[Overview Of The Unfinished Paper Market](#)

The unfinished paper market consists of sales of unfinished paper by entities (organizations, sole traders and partnerships) that produce unfinished paper from pulp that is either purchased or produced by them. The unfinished paper manufacturing industry includes the following: paper mills that may also further convert the produced paper, newsprint mills including manufacturing newsprint and uncoated ground wood paper from pulp. These mills may also involve converting the paper.
