COVID-19 Impact on Market: (Positive Impact)

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Norway Aquaculture Market Trends and Drivers:

One of the primary factors driving the market is the extensive adoption of seafood due to the rising awareness of the health benefits associated with it. Additionally, the rising demand for

exporting seafood to other countries is also propelling the market growth. Besides this, the ideal climatic conditions for cultivating aquatic animals and plants are catalyzing the market growth.

Along with this, the utilization of innovative technologies by market players to assure sustainable growth is creating a positive market outlook. Moreover, the inflating disposable income levels of the masses, the rising support by the government of Norway to promote aquaculture, and the extensive investment in research and development (R&D) activities are factors strengthening the market growth.
