COVID-19 Impact Analysis:

The restrictions imposed by various nations to contain COVID had stopped the demand and supply resulting in a disruption across the whole supply chain. However, the global markets are slowly opening to their full potential and theirs a surge in demand. The market would remain bullish in upcoming year. The significant decrease in the Global CSF Management market size in 2020 is estimated on the basis of the COVID-19 outbreak and its negative impact on the

economies and industries across the globe. Various scenarios have been analyzed on the basis of inputs from various secondary sources and the current data available about the situation.

Growth Factors

Global CSF management market is primarily driven by the increase in elderly population across the globe. Another major driving factor for CSF management market is increasing demand for minimally invasive procedures. However, the high cost of surgery is a major restraint that may limit the growth of the market. Nonetheless emerging economies such as India and China is likely to disclose the new avenues for CSF management market in the near future. Ongoing technological advancement and rising research projects related to brain injuries are the factors stimulating the market. Strong potential in treating Hydrocephalus and other brain associated disorders will fuel the market growth.
