COVID-19 Impact Analysis

Owing to the COVID-19 outbreak, there's a drastic change within the size of the Dental Consumables market, medical practices of all sizes are under immense pressure, and healthcare facilities across the world are overwhelmed by the massive number of patients visiting them on a day today. The rising prevalence of coronavirus disease has driven the demand for accurate diagnosis and treatment devices in several countries across the world. The COVID-19 pandemic has also increased the necessity for social distancing among physicians and other healthcare professionals. As a result, many imaging and diagnostic departments have experienced a rapid decline in dental consumables case volumes. This decline has important implications on the short-term and long-term economic stability across all practice settings.

Growth Factors

Growth in the dental consumables market can primarily be attributed to the rising incidence of dental diseases, availability of free checkups, increasing demand for cosmetic dentistry, growing dental tourism in emerging markets, and the increasing disposable income in developing countries is predicted to propel growth of the worldwide dental consumables market over the forecast period. For example, in February 2020, the Seattle King County Free Health Clinic, U.S., offered free dental and vision care services. Also, an increasing number of dentists is additionally expected to spice up demand for dental consumables. For instance, consistent with the American Dental Association, the amount of dentists in office within the U.S. increased from 199,486 in 2018 to 200,419 in 2019.
