Screen Printing Mesh Market

The mesh count is a measure of the number of threads of polyester (which was once silked centuries ago, hence the silk screening) that cross each other per square inlet of the screen. A 110 mesh screen would have 110 intersecting threads per square inch. The screen's mesh count is a measure of how fine the holes are.

Screen printing mesh from Haver & Boecker sets industry standards when it comes to precision printing within the hair-thin range. They are the result of close collaboration with the screen printing industry, its suppliers, and the goal of continually improving screen printing technology.
