The supersonic jet market consists of sales of supersonic jets by entities (organizations, sole traders, and partnerships) used for transporting passengers or military applications. Supersonic jets refer to supersonic aircraft powered by jet engines and travelling at speeds higher than the speed of sound. Supersonic jets typically travel at speeds greater than 750 mph but less than 1500 mph.

Technological advancement is a key trend gaining popularity in the market. According to the supersonic jet market research, companies are focusing on developing efficient and quiet supersonic technologies that are compliant with all regulatory standards. For instance, in 2019, Lockheed Martin Aeronautics, a US-based aerospace company, launched its X-59 quiet supersonic technology (QueSST) airplane, which is designed to transform the sonic boom associated with faster flight. The aeroplane cruises at Mach 1.42 (1,510 km/h; 937 mph), creating a low 75 perceived level decibel (PLdB) thump to evaluate supersonic transport acceptability.
