Rise in investment to develop autonomous systems and surge in demand for underwater drones for defense and security applications drive the global military robot market. However, high cost of military drones and communication problems associated with autonomous underwater vehicles hinder the market growth. On the contrary, rise in investment for robotics technologies in unmanned ground vehicles and surge in defense spending are expected to open new opportunities for the market players in the future.

Covid-19 scenario of Military Robot Market:

The Covid-19 pandemic forced governments across the world to impose strict lockdown restrictions and ban international import-export on non-essential items. This, sudden fall in availability of raw materials hampered the manufacturing of military robots.

The prolonged lockdown hampered the manufacturing activities due to disruption of the supply chain and lack of workforce.
