Business Research Company's

"Weathering Steel Global Market

Report 2022", the weathering steel market is expected to grow from \$1.10 billion in 2021 to \$1.18 billion in 2022 at a compound annual growth rate (CAGR) of 7.73%. The growth in the market is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. As per TBRC's weathering steel market research the market size is expected to reach \$1.70 billion in 2026 at a CAGR of 9.48%. The rapidly growing construction and transportation industry is contributing to the growth of the weathering steel market.

## Key Trends In The Weathering Steel Market

Technological advancement is a key trend gaining popularity in the weathering steel market.

## Overview Of The Weathering Steel Market

The weathering steel market consists of sales of weathering steel by entities (organizations, sole traders, and partnerships) that refer to a type of high-strength steel alloy that develops a protective oxide film on its surface. Weathering steel is being used for exposed steel buildings because it outlasts plain carbon steel under outdoor environments. This will eliminate the need for steel repainting and recoating on a regular basis. It is also used for structural steelwork in bridges, and roadside furniture.
