The network engineering services market consists of sales of network engineering services by entities (organizations, sole traders, and partnerships) that refer to planning, implementing, and managing computer networks that provide in-house phone, data, video, and wireless network services. The network engineering services providers partner with consultants, telecom companies, corporations, ISPs, and others to prepare, develop, plan, and implement projects based on customer recommendations and requirements.

Global Network Engineering Services Market Trends
Strategic partnership is a key trend gaining popularity in the network engineering market. The companies operating in the network engineering services market are focusing on entering into strategic partnerships with relevant technology players to expand into new markets and leverage each other's resources. In June 2021, L&T Technology Services Limited, an India-based engineering services company, entered into a partnership with Mavenir to deliver end-to-end 5G automation services. Mavenir is a US-based telecommunications software company creating the future network with cloud-native software that operates on any cloud.

Global Network Engineering Services Market Segments
The global network engineering services market is segmented:
By Service Type: Network Assessment, Network Design, Network Deployment
By Transmission Mode: Wired, Wireless
By Organization Size: Large Enterprises, Small and Medium-sized Enterprises (SMEs)
By Industry Vertical: Banking, Financial Services, and Insurance (BFSI), Telecom, Information Technology, Healthcare, Education, Media and Entertainment, Energy and Utilities, Manufacturing, Others
