Denim Finishing Agents Market Report

Denim finishing agents are specialized additives for dyeing and bleaching denim jeans. They include enzymes, resins, softeners, defoamers, bleaches, crush resistance, and anti-back staining agents that help highlight the color of the fabric. They assist in eliminating the impurities and enhancing the stiffness of denim to ensure dimensional stability. Besides this, they aid in improving the appearance, luster, and water and flame resistance of the fabric. As a result, denim finishing agents are extensively used in making jeans, jackets, trousers, bags, and denim accessories.

**Covid-19 Scenario:** We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
