Global Water Cooler Market Report

Water coolers refer to electronic containers that dispense drinking water at hot or cool temperatures. They are extensively available in various types, such as countertop, bottled, and under sink chillers. Water coolers operate on the principle of vapor compression refrigeration cycle, which consists of a condenser, evaporator, compressor, and expansion valve. The high-pressure refrigerant pours through a heat exchanger, where it is condensed to transform the liquid into a gas by absorbing heat to provide cool or hot water. These containers assist in filtering impurities and maintaining the water quality at cost-effective rates. As a result, water coolers find widespread applications across commercial and residential establishments.

COVID-19 Impact on Market: (Positive Impact)

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Global Water Cooler Market Trends and Drivers:

The escalating product demand across several industrial verticals, including commercial, residential, hospitality, healthcare, public, etc., is among the primary factors driving the water cooler market. Besides this, the increasing consumer awareness towards the benefits of these containers, such as portability, energy-efficiency, minimal maintenance costs, easy usage, and flexible dispensers with hot and cold supply technology, is further augmenting the market growth.

Apart from this, the introduction of multi-purpose and bottle-less water coolers in various organizations and educational institutions, owing to their purification, highly certified filtration, and antimicrobial services, is also catalyzing the global market. Moreover, the development of contactless usage of these containers, on account of the sudden outbreak of the COVID-19 pandemic across countries, is anticipated to propel the water cooler market over the forecasted period.
