

C development framework Vely 12 released

Vely 12, a new version of framework for C developers, has been released.

QUEEN CREEK, AZ, USA, September 14, 2022 /EINPresswire.com/ -- Dasoftver LLC has released Vely 12, a comprehensive software development framework for C programming language. This version brings new powerful features along with bug fixes and cleaner and simplified statements.

New features include JSON and UTF8 support.

C programmers can use another new feature, hash tables, for quick storage and lookup of data in memory.

Regex search and replace is considerably faster with new caching capability in Vely 12.

SQL queries are simplified and easier to use with most functionality available in enhanced run-query statement. New on-error-exit and on-error-continue clauses allow developer to fine tune error handling on a statement level as well as application level.

Web programming got a boost with ability to set cookies even after HTTP header was output, and the ability to use a query string with POST request when writing web HTTP forms.

Debugging applications has also been made quicker with a new option for easier finding of trace files created with improved trace-run statement,
