The asset servicing market consists of services for wealth management companies and capital markets. Asset servicing comprises services such as reorganization and proxy services, safekeeping services for physical securities, dividends, and electronic registration and transfer of securities. The assets servicing industry is a critical component of global financial markets and plays a vital role in the safekeeping of financial assets.

## [Global Asset Servicing Market Trends](#)

According to the asset servicing market trends, robotic process automation (RPA)/ automation is shaping the growth of the market. Robotic process automation alone could reduce the headcount by 60-70% in the assets servicing industry while also achieving cost savings of approximately 30-40%. Robotic process automation (RPA) refers to a set of software tools known as bots or robots that are used to perform a repetitive or routine business process which is currently used by transaction processing teams or service centers.
