

Middle East and Africa Body Composition Analyzers Market is Set to Witness Huge Growth at a CAGR of 10.05% by 2028

Middle East and Africa Body Composition Analyzers Market Industry Analysis and Forecast 2028

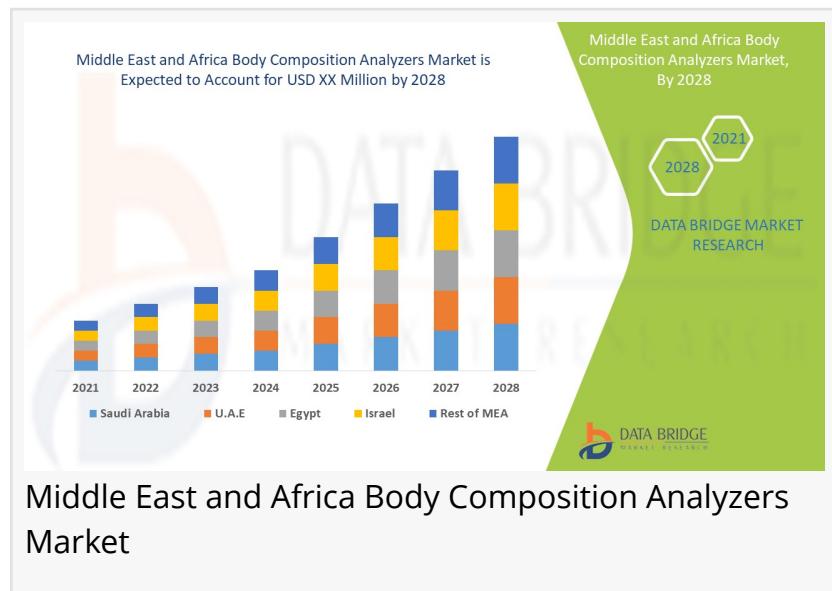

PUNE, MAHARASHTRA, INDIA, September 14, 2022 /

EINPresswire.com/ -- The wide-reaching [Middle East and Africa Body Composition Analyzers Market](#)

research report brings into focus the key market dynamics of the sector. This market study also analyzes the market status, market share, growth rate, future trends, market drivers, opportunities, challenges, risks, entry barriers, sales channels, distributors, and Porter's Five Forces Analysis. The report provides fluctuations in CAGR values during the forecast period of the market. The transformation in the market landscape is mainly observed due to the moves of key players or brands which range from developments, product launches, joint ventures, mergers, and acquisitions that in turn change the view of the global face of the industry.

Body composition refers to the ratio of lean muscle mass, fat mass and water that are present in the body. Body composition analyzers are basically a kind of diagnostic device used for the diagnosis of segmental and full body composition. The devices are utilized for measuring minerals, protein, body water and fat content. These are used for analyzing various body parameters such as muscle mass, lean mass, fat and fat free content and water percentage, among others.

The rise in the prevalence of obesity across the region acts as one of the major factors driving the growth of body composition analyzers market. The surge in government initiatives to encourage adoption of healthy lifestyle and use of the equipment to calculate different components such as minerals, fat, protein, and body water accelerate the market growth. The increase in health club memberships among population and rise in incidences of metabolic disorders further influence the market. Additionally, increase in population, use in every well-

equipped laboratory, rise in venture capital investments, development in the healthcare infrastructure and surge in healthcare expenditure positively affects the body composition analyzers market. Furthermore, increase in number of fitness clubs, weight loss clinics, and sports rehabilitation centers extend profitable opportunity to the market players in the forecast period of 2021 to 2028.

About Data Bridge Market Research, Private Ltd

Data Bridge Market Research Pvt Ltd is a multinational management consulting firm with offices in India and Canada. As an innovative and neoteric market analysis and advisory company with unmatched durability levels and advanced approaches. We are committed to uncovering the best consumer prospects and fostering useful knowledge for your company to succeed in the market.

Data Bridge Market Research is a result of sheer wisdom and practice that was conceived and built-in Pune in the year 2015. The company came into existence from the healthcare department with far fewer employees intending to cover the whole market while providing the best class analysis. Later, the company widened its departments, as well as expanded its reach by opening a new office in the Gurugram location in the year 2018, where a team of highly qualified personnel joins hands for the growth of the company. "Even in the tough times of COVID-19 where the Virus slowed down everything around the world, the dedicated team of Data Bridge Market Research worked round the clock to provide quality and support to our client base, which also tells about the excellence in our sleeve."
