

# Carbon Disulfide Market is Expected to Observe Considerable Growth Opportunities to 2029

*new partnerships and technology transfer between industry players is anticipated to foster the global carbon disulfide market size.*

OREGON, PORTLAND, UNITED STATES, September 14, 2022 /

EINPresswire.com/ -- Proliferating demand for carbon disulfide in the production of cellophane boosts the segment growth in the packaging industry. Further usage of CS<sub>2</sub> as an alternative to ammonia fertilizers is expected to drive the [carbon disulfide market](#) growth over projected time frame. In addition, increase in application of CS<sub>2</sub> to protect fruits from fungus and insects is predicted to fuel its demand in the food industry.

However, stringent government regulation on the use of carbon disulfide owing to its adverse health effects such as headache and confusion is projected to stagnate the market growth

Carbon disulfide (CS<sub>2</sub>) appears as a colorless to light yellow volatile liquid with an unpleasant odor. It is used as an insecticide, fumigant, non-polar solvent, and as an optical dispersant in spectroscopy. Due to properties such as insolubility in water and high flammability, carbon disulfide is primarily used as a raw material to manufacture different products such as carbon tetrachloride, cellophane, fertilizer, and viscous rayon. In addition, impure type of CS<sub>2</sub> is a yellowish liquid with a pungent smell that is widely used in the industrial process. Carbon disulfide traces are found to the surface of the earth from volcanic eruptions and is commercially produced through the reaction of carbon and sulfur at an elevated temperature.

Key drivers that are propelling the growth of the market included in the report. Additionally, challenges and restraining factors that are likely to curb the growth of the market are put forth by the analysts to prepare the manufacturers for future challenges in advance.

The report presents in-depth insights into each of the leading Carbon disulfide market end user verticals along with annual forecasts to 2027. The report provides revenue forecast with sales, and sales growth rate of the global Carbon disulfide market. The forecasts are also provided with respect to the product, application, and regional segments of the market. The forecasts are issued to understand the future outlook and prospects of the industry.

The market is evaluated based on its regional penetration, explaining the performance of the market in each regional market covering provinces such as North America (United States, Canada and Mexico), Europe (Germany, France, UK, Russia and Italy), Asia-Pacific (China, Japan, Korea, India and Southeast Asia), South America (Brazil, Argentina, Colombia), Middle East and Africa (Saudi Arabia, UAE, Egypt, Nigeria and South Africa)

Top 10 leading companies in the global Carbon disulfide market are analyzed in the report along with their business overview, operations, financial analysis, SWOT profile and products and services. The key players operating in the global CARBON DISULFIDE MARKET industry include Shanghai Baijin Chemical Group Co., Ltd., Nouryon, Arkema Group., Alfa Aesar, Liaonian Ruixing Chemical, Toyobo.

Latest news and industry developments in terms of market expansions, acquisitions, growth strategies, joint ventures and collaborations, product launches, market expansions etc. are included in the report.

### Key Benefits

- The report provides a qualitative and quantitative analysis of the current Carbon disulfide market trends, forecasts, and market size from 2020 to 2027 to determine the prevailing opportunities.
- Porter's Five Forces analysis highlights the potency of buyers and suppliers to enable stakeholders to make strategic business decisions and determine the level of competition in the industry.
- Top impacting factors & major investment pockets are highlighted in the research.
- The major countries in each region are analyzed and their revenue contribution is mentioned.
- The market report also provides an understanding of the current position of the market players active in the Carbon disulfide industry.

## Highlights of the Report

- Competitive landscape of the Carbon disulfide market.
- Revenue generated by each segment of the Carbon disulfide market by 2027.
- Factors expected to drive and create new opportunities in the Carbon disulfide industry.
- Strategies to gain sustainable growth of the market.
- Region that would create lucrative business opportunities during the forecast period.
- Top impacting factors of the Carbon disulfide market.
