Market Analysis and Insights Global Night Blindness Treatment Market

[Night blindness treatment market](#) is expected to gain market growth in the forecast period of 2022-2029. Data Bridge Market Research analyses the market to account to grow at a CAGR of 6.30% in the above mentioned forecast period.

Night blindness, is a disorder in which your eyes are unable to adjust to low light circumstances. Night blindness is most commonly caused by abnormalities with your rod cells, but it can also be caused by a variety of other factors. Night blindness affects people's ability to see in dimly lit areas or at night. The treatment for night blindness is entirely dependent on the underlying reason. It is caused by a variety of illnesses that cause the retina's rods to degenerate. It is also termed as nyctalopia. This condition is characterized by eye pain vomiting, cloudy vision, halos, light sensitivity, distance vision problem, and headache.

The rise in the prevalence of myopia and vitamin A deficiency will act as major driver that will result in the expansion of market's growth. Another significant factor influencing the growth rate of night blindness treatment market is the rising healthcare expenditure. Furthermore, advancement in the medical technology, rising initiatives by public and private organisations to spread awareness and growing government funding are the factors that will expand [the night blindness treatment market](#). Other factors such as increase in the demand for effective therapies and rising geriatric population will positively impact the night blindness treatment market's growth rate. Additionally, high disposable income and increase in the incidences of diabetes, glaucoma and cataract will result in the expansion of night blindness treatment market.
