Drivers

Rising Prevalence of Conditions

Growing incidence rate of spinal and back disorders globally is one of the major factors fostering the growth of the market. Kyphosis and hunchback are the common spinal conditions found

globally. More than 10 million cases of kyphosis per year are witnessed in India and this condition may prevail for lifetime if not treated properly.

Research and Development Proficiencies

Rising expenditure for research and development proficiencies especially in the developed and developing economies pertaining to the medical instruments and devices will further create lucrative market growth opportunities. Research and development proficiencies being conducted for the advancements in medical technologies and devices is also bolstering the market growth rate.

Growing Investment for Healthcare Facilities

Surging focus towards improving the condition of healthcare facilities and improving the overall healthcare infrastructure another important factor fostering the growth of the market. Rising number of partnerships and strategic collaborations between the public and private players pertaining to funding and application of new and improved technology is further creating lucrative market opportunities.

Opportunities

Furthermore, upsurge in the public-private funding for target research activities, rising complaints of regular back pain owing to long working hours in the seating position among the population and rising product innovations and development owing to technological advancements all around the world will extend profitable opportunities for the market players in the forecast period of 2022 to 2029. Additionally, unhealthy lifestyle of individuals, rising internet penetration rate, rising geriatric population base, change in consumer's preference to natural treatments, product development and commercialization and increasing per capita expenditure on health care will further expand the market's growth rate in the future.

Restraints/Challenges Global Posture Corrector Market

On the other hand, high cost associated with the research and development proficiencies, limited infrastructural facilities, uneven distribution of medical services, dearth of skilled medical professionals, and dearth of awareness in the backward economies are expected to obstruct market growth. Also, lack of favorable reimbursement scenario and technology penetration in the developing economies, emergence of alternative technologies, perception about posture correctors being medical aid for patients rather than an everyday application, weakening of muscles due to prolonged usage of posture corrector, limited insurance coverage and regulatory compliance, and lack of suitable infrastructure in low- and middle-income countries are projected to challenge the market in the forecast period of 2022-2029.
