PUNE, MAHARASHTRA, INDIA,  
September 14, 2022 /  
EINPresswire.com/ -- Jaw Surgery  
Market to Grow at a CAGR of 2.9% over  
the forecast period 2023 to 2032

The [Global Jaw Surgery Market](#) reach USD USD 705.0 Million in 2022 and is expected to exhibit a CAGR of 2.9% over the forecast period 2023 to 2032, according to a recent global market study by Quince Market Insights.

Jaw surgery, also known as orthognathic surgery (or-thog-NATH-ik), corrects jaw dislocations and directs the jaws and teeth to improve function. Making these adjustments can also improve your facial expressions.

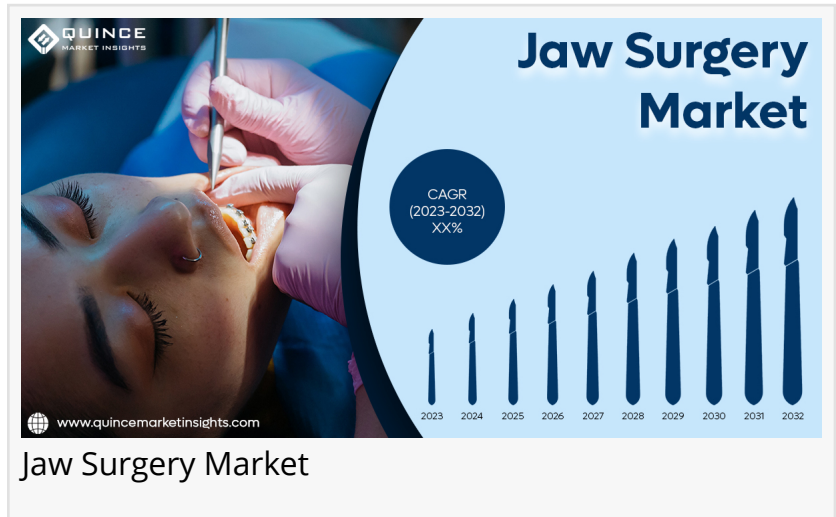

Jaw surgery may be an option if you have jaw problems that cannot be solved by orthodontics alone. In most cases, you also have braces on your teeth before surgery and during recovery after surgery to complete healing and alignment. Your dentist can work with your oral and facial (maxillofacial) surgeon to determine your treatment plan.

Jaw surgery is appropriate after puberty, usually between 14 and 16 years for women and 17 to 21 years for men.

Drivers:

- Rising demand for cosmetic jaw surgery

- Technological advances in the health care sector.
- Increasing the demand for dental surgery due to the growing awareness of facial features

#### Restrain:

- High cost for the treatment
- Problems related to digital emergence and product memory are expected to challenge the computer-assisted oral and maxillofacial surgery market in the forecast period.

#### Opportunity:

- Research and development in the healthcare sector
- Introducing new technology for dental solutions.

#### Challenges:

- Many problems are created after and during the surgery such as loss of portion of the jaw, jaw fractures, infection, need for root canal.

### Impact of COVID 19 on Jaw Surgery Market

The recent outbreak of COVID-19 began in Wuhan (China) in December 2019, and has since spread rapidly around the world. Countries worst affected by the number of positive cases and deaths reported, since March 2020. The outbreak of COVID-19 has affected the economy and industry in countries vary due to closure, travel restriction, and business closure.

China, Italy, Iran, Spain, the Republic of Korea, France, Germany and the US are among the COVID-19 epidemic that severely affected the jaw surgical market. It has led to the cancellation and reorganization of surgical procedures at the international level. For surgeons operating in the craniomaxillofacial (CMF) field, surgical procedures are limited to emergency or emergency situations. Medartis AG, a leading manufacturer of craniomaxillofacial implants, reported that the company's products had seen a decline as selection processes were suspended which led to production delays and supply chain problems.

### Jaw Surgery Market, By Indication

Based on the indication, Jaw Surgery market is divided into chronic pain in the jaw or jaw pain, facial trauma, maxillary and/or mandibular facial skeletal deformities, speech impairment, and others.

Chronic pain in the jaw or jaw pain is expected to boost the largest share in the market during the forecasting period.

### Jaw Surgery Market, By Instruments

Based on Instruments, Jaw Surgery market is divided into retractor and speculums, elevators,

forceps and needle holder, curettes and others.  
Curettes is expected to boost in the forecasting period.

### Jaw Surgery Market, By End user

Based on the end user, Jaw Surgery market is divided into clinics, hospitals and others.  
Dental clinic is expected to grow during the forecasting period.

### Jaw Surgery Market, By Region

The region segment includes major regions such as Asia Pacific, Middle East & Africa, North America, Europe, and South America.  
North America is expected to grow the market. It is due to the growing demand for jaw surgery and the growing number of clinics and hospitals that offer jaw surgery.
